Tom,

We are working with headquarters on the question of whether or not a source that meets the definition of true minor source, but also has a synthetic minor NSR permit for Title V purposes and also meets the definition of synthetic minor source is applicable to the O&NG FIP for modifications. Headquarters , and do not have a determination at this time. In the meantime, if necessary, you may wish to reach out to the source to inform them it is under review and the potential risk incurred if we do not ultimately agree with their determination.
